

INDICATIVE SEAL MEGA TWISTER CLICK (MTC) Application Seal

Two-way locking in one body for an all-inclusive security.

The Mega Twister Click is an innovatively designed utility seal with two locking mechanisms in one body. This specialty allows a thorough sealing and security, along with a large marking flap for identifiers. The seal is small in size and versatile for any securing and identifying purposes. These seals include the BioSphere bio-additive. To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13th May 2024.

Applications:

- Utility Meters & Scales
- Chemical and Oil Refinery
- Transportation
- Banking

Our biodegradable plastic additives go deeper, allowing microbes to consume the C-C bonds within plastic's structure at a macromolecular level. This increases the surface area of plastic products and enables plastophilic microbes to attach to the polymer's newfound cavities. So, unlike regular plastic that can sit in a landfill for hundreds or thousands of years, plastic enhanced with BioSphere attracts over 600 different types of microbes that effectively digest and consume it.

PREVENTION • PROTECTION • PEACE OF MIND

MEGA TWISTER CLICK
000000

- 1 The Mega Twister Click is moulded with a twister locking insert and white cap ultrasonically and heat staking welded in a plastic translucent body for a clear view of the locking and evidence of tampering.
- 2 Stainless steel wire is required for the twister locking to achieve tight securing on the latches while the snap-on locking mechanism alternates as a quick sealing feature.
- 3 A large marking area on the snap-on locking flap allows for irreversible laser marking of identifiers such as name, logo, barcode, serial number and QR code.
- 4 Colour coding is possible with a combination of translucent plastic body and vibrant colour insert, which is available in a wide range of choices.
- 5 These seals include the BioSphere bio-additive.
